Hva var dine forventninger til Flute Futures
I was waiting for something similar we actually had. A lot of young flutists, interesting topics and inspiration.The Flute Festival was great addition to the course.

Opplevde du at forventningene ble innfridd
Yes.

Hva opplevde du som mest spennende
It was the most fun to play together in the ensemble and meet all the new people.

Mener du at Flute Futures var viktig for deg
Yes, it was important. I got many new contacts and friends. There were also many interesting topics about building a career.

Hva kunne du ønske det i tillegg
It would have been nice to have more flute ensemble or playing, but I understand the funding of FF was educational, not performance based. It would have been interesting to have more practical examples in the presentations, for example using one of us as an example student in the pedagogical lectures, or usage of other arts like acting or painting to include the participants. Maybe working in smaller groups in the afternoon when the energy levels started to drop? So more group activities, and also mixing the countries. Of course, sometimes we had inclusive lectures already now🙂. So, all in all, more including the participants instead of PowerPoints and talking, since the days were long.

Var det ellers noe du savnet
It would have been great to have practice rooms, because one week is a long time to be without playing in the start of the semester. Some people had an exam or an audition coming up.
